SMART PARK

Smart parking for a smart city.

P

Sound familiar?

Winter break. New Orleans. Bourbon Street.

We got there at 10 PM — but we didn't start exploring until 10:30. Why?
Because it took us 30 minutes to find parking that was a long walk away from where we actually wanted to be.
Frustration → stress → not good :(

If you've ever driven in a busy city, you know exactly how frustrating that is.

What if we could solve that?

INTRODUCING

SmartPark

A web app designed to eliminate the frustration of finding parking in busy areas.

SmartPark shows you real-time available spots, transparent pricing, and gets you there with seamless Google Maps integration — so you spend time at your destination, not looking for it.

What if finding parking was the easy part?

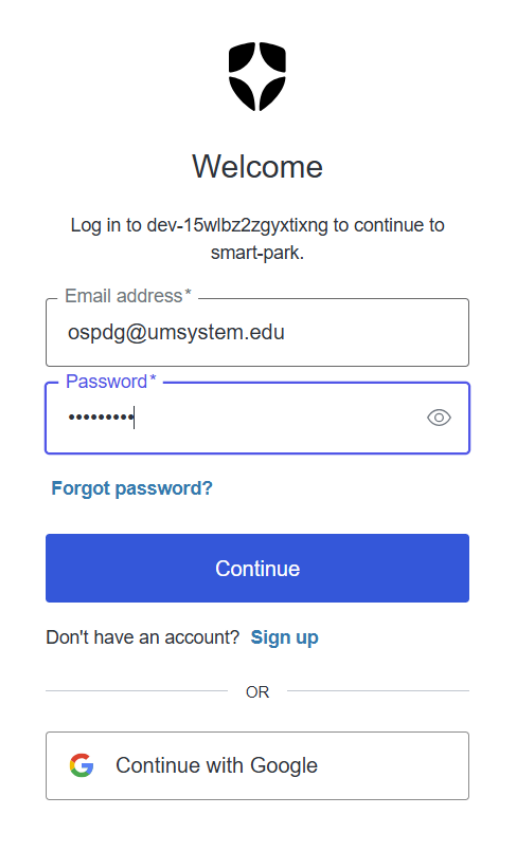
Let’s get you set up.

Auth0

Save time by adding your credentials and information on Auth0 for as a safe information storage.

Info?

1. Add your name and email
2. User ID → car information
3. Add and remove vehicle info



FIND PARKING

01

See what's available before you go.

Let's say you're heading to downtown St. Louis. SmartPark lists parking garages near your location with live spot counts and current pricing — right on screen. No guessing, no circling, just options.

It's your pick: cheaper or shorter distance?

- Closest spot: Perfect when you're running late or carrying a lot.
- Best price: Great for longer stays or when you have time to walk.

AVAILABLE

Central Downtown Garage

7th Street, St. Louis, MO 63102, United States of America

PRICE	DIST	WALK	SPOTS
$16/hr	0.0mi	0min	47

AVAILABLE

Pine Street

St. Louis, MO 63103, United States of America

TECHNICAL

03

Let’s talk technical

1 APIs Used

- Supabase
- Geoaipfy
- Auth0

2 Authentication

- Auth0: cloud-based identity platform that provides authentication and authorization services for applications and APIs.

3 Database

- Supabse: open-source backend platform that providing a hosted database, authentication, and APIs to help developers quickly build and scale applications.

4 Deployment Tools

- VITE
- React

Future Iterations

1 Timer

- From the time you pay and enter the garage a timer starts keeping track of your payment charges and the time your vehicle is in the garage.

2 Car location tag

- Forgot where you parked? Smart park has your back. By tagging your vehicle's location in the parking garage you can find your cars faster.

3 15 min notification – Email.js

- Don't worry about keeping a track of time. Smart park will take care of that and send a notification to your device 15 minutes prior to the next charge.

STEP 5 · STAY INFORMED

Lost track of time? We've got you covered.

SmartPark sends you a push notification 15 minutes before your parking session expires, giving you the choice to extend your time or head back. Plus, your car's location is always saved.

SmartPark · Now

⏰ **Parking expiring soon**

Your session ends in 15 minutes.
Would you like to extend your parking time?

Extend Time | No Thanks

Your Vehicle Location

Kiener Plaza Garage · Level 3 · Section B · Spot 14
SmartPark will guide you back to your car when you're ready to leave.

Smart Parking in a Smart City.

SmartPark transforms how people find, pay, and manage parking in busy cities — turning a 30-minute headache into a 30-second solution.
